

Direct Hire from MCI continues makes further inroads in the recruitment market

MCI Consultants, the largest distributor of staffing software in Southern Africa, today announced that its latest recruitment software, Direct Hire, has made further inroads into the recruitment market with a deal from HomeChoice Holdings, a leading direct marketing retailer.

“We continue to be amazed at the interest that has been shown in this software,” commented Aliko Droussiotis, a Director of MCI Consultants, “even though we realised that there was a significant need in the recruitment market for a solution that is delivered on a Software as a Service (SaaS) basis and can be run by the organisation itself.”

“We came to the decision to implement Direct Hire after carefully comparing the system to all the other e-recruitment products currently available in the market,” added Jacolet Van Heerden -Recruitment Manager at HomeChoice. “This process made it extremely clear to us that Direct Hire not only had the best and most robust functionality available of all the products out there, but was best suited to managing and streamlining the recruitment process in a large corporate environment such as ours.”

Direct Hire is a powerful, versatile and easy to use e-Recruitment solution for medium-sized and large organisations that has been specifically designed and developed by MCI Consultants to automate the requisition-to-hire process.
