

MCI celebrates 20 years of providing JSE-linked software for the stock broking community

MCI Consultants today announced that it has been providing JSE-orientated software for the stock broking community for the past 20 years. In this regard, it is an accredited JSE supplier and has gained the reputation of being at the forefront of this industry.

Its portfolio in this regard consists of a range of back-end solutions that includes the implementation and support of the Accpac range of accounting software; and a BDA to Accpac Interface, which allows brokers to automatically upload and download transactions to and from various modules of the Accpac range of accounting software and facilitates the automatic production of management reports, automatic bank reconciliations and electronic payments.

In addition, MCI has also provided a set of financial markets solutions that includes:

- * TradeCIS, a customised trading system for improved trade efficiencies;
- * NetCIS, a Web-based trading platform;
- * PortCIS, a portfolio management system; and
- * A mobile trading application.

“This year is a major milestone for us here at MCI Consultants and we are proud of and congratulate the team that has enabled us to become successful in this market,” commented Aliko Droussiotis, Director, MCI Consultants. “We will continue to work closely with the financial services market in order to provide them with the software and services they need going forward.

“I’m also delighted at this time to announce our latest success, ie a deal with Prescient for the BDA/Accpac interface. This is a new client and we welcome them to our ever-growing customer list and look forward to cementing and extending our relationship with them over the coming months and years,” concluded Droussiotis.
