

MCI enters into agreement with Interactive Data

MCI Consultants today announced that it has entered into an agreement with Interactive Data with the aim to enable it to provide its stock broker customers with stock exchange information from multiple exchanges from across the world through Interactive Data's Consolidated Feed.

“We have incorporated the Interactive Data's Consolidated Feeds into our Trading system, TradeCIS. TradeCIS provides the necessary interfacing to enable our clients access to the content from Interactive Data,” commented Jan Rabbets, Business Partner at MCI Consultants. “Thus again, we have been able to listen and respond appropriately to the needs of our customers.”

“We are pleased MCI selected Interactive Data to deliver global financial information to a wide range of MCI clients in Africa,” said Rob Lane, European Business Manager, Trading Solutions at Interactive Data. “MCI clients can benefit from Interactive Data's Consolidated Feed with real-time depth of book market data from more than 450 sources, including over 150 exchanges worldwide.”

“As a result of this relationship with Interactive Data, TradeCIS now includes additional content features, including real-time market depth for enabled exchanges; customisable instrument lists for subscribed exchanges; long-term and intraday instrument charting; instrument information; exchange instrument search; trade history; and, customisable exchange tickers,” concluded Rabbets, “hence we are now able to offer a more comprehensive and competitive trading solution.”

MCI provides mission-critical software and IT services to institutions in virtually every segment of the financial services industry. As a JSE accredited supplier and an accredited JSE Shared Infrastructure Provider (SIP), MCI serves as a primary IT solutions provider to the stock broking community and is today considered to be at the forefront of the industry.
