

FOR IMMEDIATE RELEASE

MCI expands further into Africa

MCI Consultants today announced that as part of its ongoing commitment to expanding its Sage operations beyond the borders of South Africa, it has engaged with the GSK Group, based in Djibouti, to assist with resolving a number of institutional challenges, as well as to provide ongoing support in order to optimise the use of their Sage 300 ERP system.

“We will be focussing on the optimisation of operational and financial procedures related to their ERP systems, as well as providing training and support wherever necessary,” explained Tonya Harvey, a Business Partner at MCI Consultants. “The GSK Group needed a company that could provide dedicated resources to their organisation for this ongoing activity.

“Specific issues already identified include addressing the unique demands of multiple related companies that are currently unable to share information and data that should be readily accessible, given the commonality in activities that exists,” continued Harvey.

“New initiatives are always exciting, and this is no exception,” concluded Harvey.

“Over the past twelve months we have announced several global activities including some in Africa; the Middle East; and Central and South America; and, are working on deals in other areas such as Australia and Europe.”
