

FOR IMMEDIATE RELEASE

MCI releases the 2015 results of SA's biggest HR Recruitment trend survey

MCI Consultants, the largest distributor of staffing software in Southern Africa, today announced the results of its 2015 SA HR Recruitment trend survey that received 1367 responses from HR professionals from across the country and a cross section of organisation sizes. This is the fourth consecutive year that MCI Consultants have undertaken the running of this survey.

“We believe this one to be the largest survey of its kind to be conducted in South Africa,” commented Rhett Davies, Partner at MCI. “The interest shown in this survey clearly indicates that recruitment is an area that is causing many challenges for companies as they seek to grapple with the ongoing skills shortage that exists in this country.”

Some of the highlights from the survey were as follows:

- Talent retention increased with the majority of companies reporting staff turnover of between 5-10%, the lowest it has been in years;
- 89% of organisations attempt to source and place candidates internally before approaching recruitment agencies;
- 64% of organisations have implemented a strategy to ensure that their recruitment process is POPI compliant;
- 74% of organisations use social media to recruit candidates; with LinkedIn being by far the most successful; ;
- 56% of organisations use a recruitment management system such as MCI's Direct Hire system;
- Overall, recruitment agencies and internal referrals gave the best quality candidates; whilst print media gave the worst;

An infographic summarising the survey is shown below; however, the full results of the survey can be found at <http://bit.ly/HRsurvey2015>

MCI's Direct Hire solution is a powerful, versatile and easy to use e-Recruitment solution for medium-sized and large organisations that has been specifically designed and developed by MCI Consultants to automate the requisition-to-hire process.
