

Thebe Stockbroking partners with MCI Consultants

MCI Consultants today announced that Thebe Stockbroking (Pty) Ltd. had recently installed several ACCPAC ERP financial modules together with the JSE/ACCPAC interface that had been developed by MCI.

“Not only did we assist Thebe Stockbroking with the implementation of the ACCPAC solution,” commented Aliko Droussiotis, Director at MCI Consultants, “but also designed and set up the various customised reports they required to be generated on a regular basis.”

“We chose ACCPAC not only because we needed a user friendly accounting system, but one could be easily interfaced to the JSE’s systems,” added Ginette Anderson at Thebe Stockbroking. “MCI demonstrated to us that not only did they have the necessary ACCPAC skills but had developed an ACCPAC/JSE interface that was being utilised by several other similar organisations. MCI also have a thorough understanding of the financial services market and in particular the stockbroking environment that was also very important to us”.

“We now have nearly twenty years of experience working with clients in the financial services industry and pride ourselves on our understanding of this market,” concluded Droussiotis. “We are delighted to add Thebe Stockbroking to our list of clients in this sector.”

Thebe Stockbroking (Pty) Ltd, a subsidiary of Thebe Investment Corporation, offers trading in equities, fixed interest and derivative products and offers individual clients quality investment services.
